# Net Interest Income & NIM

#### **Net Interest Income**

- 2Q/24 net interest income increased by 3.7% QoQ, mainly from higher interest on loans from interest rate repricing.
- 1H/24 net interest income increased by 25.0% YoY, attributed to an increase in interest on loans from combination of the acquired overseas businesses and an increase in lending rates, while being partially offset by higher interest expenses on deposits and interbank and money market items, resulting from an increase in outstanding balance as well as interest rates.

#### NIM

- NIM in 2Q/24 increased 17 bps from 1Q/24 to 4.33%, driven by a higher yield on earning assets. This was primarily due to a shift of composition from lower yielding assets to higher yielding assets.
- NIM in 1H/24 increased by 79 bps to 4.31%, driven by an improvement in the yield on earning assets of 142 bps to 6.29%, while being offset by a 70 bps increase in the cost of funds.

# Non-Interest Income and Fees & Service Income Breakdown

#### Non-Interest Income

- 2Q/24 total non-interest income decreased by 0.6% QoQ.
- 1H/24 non-interest income increased by 26.6% YoY, which were mainly driven by net fees and service income from the overseas consumer businesses acquired in 2023, an increase in bancassurance domestically, an increase of bad debt recoveries, and gains on financial instruments measured at fair value through profit or loss (FVTPL).

\* FVTPL: Fair value through profit or loss

\*\* Others: Comprises wealth and fund management, securities-related, investment banking, and collection fees

## Productivity

#### **Operating Expenses**

- 2Q/24 operating expenses increased by 3.9% QoQ. The increase was propelled by employee expenses from higher salary and incentives, together with other expenses, mainly from impairment on foreclosed properties, and professional and IT expenses.
- 1H/24 operating expenses increased by 24.6% YoY which were mainly driven by the overseas consumer businesses acquired in 2Q/23 and 4Q/23, particularly employee expenses together with other expenses—mainly from IT related expenses, amortization expenses, and professional expenses.

#### **Cost to Income Ratio**

- The cost to income ratio in 2Q/24 was at 43.6%, compared with 43.0% in 1Q/24 and 42.9% in 2Q/23.
- 1H/24 the cost-to-income ratio improved to 43.3% from 43.6% in 1H/23.
- Krungsri Group will continue managing operating expenses efficiently and focusing on revenue enhancement to achieve the year's cost to income ratio target in the mid-40s.

# Profitability

**Pre-Provision Operating Profit (PPOP)** 

#### • 2Q/24 PPOP increased by 1.3% QoQ.

• 1H/24 PPOP increased by 26.0% YoY, supported by both higher domestic operating income, following the notable growth in both net interest income and non-interest income, and full recognition of revenue streams from the ASEAN entities acquired in 2023.

#### Net Profit (attributable to owners of the Bank)

- 2Q/24 net profit increased by 8.8% QoQ driven by an increase in operating profits and lower expected credit loss (ECL).
- 1H/24 net profit decreased by 7.9% YoY, mainly due to rise in expected credit loss driven by prudential provisions for overseas consumer finance subsidiaries and domestic auto hire-purchase.

## Loan Portfolio

- Resonating Thailand's operating environment and customer loan demands for the first half of 2024, commercial lending comprising corporate and SME customer segments grew by 0.8%, while retail loans contracted by 3.5% from December 2023.
- As of June 30, 2024, total outstanding loans stood at Baht 1,991,931 million, a contraction of 0.4% from the end of March 2024, and 1.3% from 2023.

#### Loan Breakdown

• At the end of June 2024, commercial loans, comprising corporate and SME loans, accounted for 53% of the total loan portfolio, while retail lending represented the remaining 47%.

Remark\*: ASEAN included Hattha Bank Plc. (CBDA), Hattha Services Company Limited (CBDA), Krungsri Leasing Services Company Limited (LAOS), Krungsri Non-Deposit Taking Microfinance Institution Company Limited (LAOS), SHBank Finance Company Limited. # Loans by Segment

- Corporate loans increased by 2.3% QoQ, driven by Thai corporate loans increased by 4.3% QoQ, while International Corporate (JPC/MNC) loans decreased by 1.6% QoQ.
- Corporate loans expanded by 0.8% from the end of December 2023, driven mainly by working capital demands through Thai corporate loans
  particularly in 2Q/24, while International Corporate (JPC/MNC) loans contracted due to modest exports growth and the tepid demand for
  automobiles.

SME Breakdown

SME Definition:

SME-Medium (SME-M): Company with annual sales turnover > 150 million baht to 1,000 million baht SME-Small (SME-S): Company with annual sales turnover > 20 million baht to 150 million baht Business Banking (SME-BB): Company with annual sales turnover < 20 million baht

- SME loans contracted by 1.7% QoQ resulting from tightening underwriting conditions.
- SME loans grew by 0.9% from the end of December 2023, mainly driven by our support for SME-M's working capital requirements.

# Loans by Segment: (Cont.)

#### **Retail Loans**

- Auto hire purchase loans decreased by 2.0% QoQ and by 3.4% from the end of December 2023 mirroring a sharp contraction in domestic car sales together with the industry's tighter credit conditions amidst deteriorating debt-servicing capacity of customers.
- Mortgage loans contracted by 2.5% QoQ and by 4.7% from the end of December 2023. The development reflected both demand and supply conditions encompassing reduced affordability of homebuyers, as well as an increase in construction cost for developers.
- Credit card, personal loans and others decreased by 0.4% QoQ and by 4.9% from the end of December 2023 as a result of responsible lending measures amidst high household indebtedness.
- ASEAN loans, which mainly encompassed consumer finance products, in contrary, grew by 1.6% from the end of December 2023, underscoring more favorable demand conditions in the Philippines, Indonesia, and Vietnam. Compared with 1Q/24, ASEAN loans contracted by 2.4%.

Note: 2024 forecast by Krungsri Research

#### Krungsri Research's view:

- Krungsri Research revised down 2024 GDP growth forecast from 2.7% to 2.4% to reflect longerthan-expected delays in public spending, weak exports, and structural headwinds. Year-on-year growth, however, is expected to improve to around 3% in 2H24 from below 2% in 1H24.
- The Thai economy should see a cyclical recovery with further growth in the tourism sector and accelerating disbursement of public spending from mid-2024, particularly capital expenditures (after a 7-month delay in the budget bill).
- The outlook for the policy rate remains stable at 2.5% for the rest of the year, supported by (i) BOT's views of easing downside risks to growth and ongoing concerns over financial stability prompting deleveraging efforts, (ii) MPC consensus that the current policy rate is appropriate, with less support for a rate cut in the latest meeting, and (iii) the BOT's focus on targeted monetary policies reinforcing the expectation that broad-based rate cuts are unlikely this year.

#### **Tailwinds**

- Recovery in tourism sector and employment
- Higher public spending and policy supports (stimulus measures, infrastructure project)
- Easing supply disruption
- Food security and gains in agricultural sector
- Regionalization, ASEAN dynamism, FDI
   movement
- Thailand's sound economic fundamentals (high foreign reserves, relatively low external debt, and resilient banking sector)

#### **Recent Developments in Economic Activity**

- Tourism sector has been a key driver of economic growth. Sub-par global growth, domestic structural problems, and a delay in Budget Bill limited overall growth.
  - Tourism sector has continued to recover, facilitated by the Visa-Free scheme and improving supply headwinds.
  - Private consumption expanded on the back of improving service sectors, a strong labor market and recent stimulus measures but high household debt and high interest rates weighed on growth of domestic spending.
  - Exports poised for a technical rebound and diverging growth, fueled by the alleviation of supply disruptions and a low-base effect. Structural problems and external headwinds, including trade tensions, would drag Thai exports.
